- **Frontend:** TypeScript, JavaScript, HTML, CSS, React, React Native, Next.js, Vue, Tailwind, Storybook
  - **Backend:** Node.js, NestJS, GraphQL, MongoDB, PostgreSQL, Supabase, Firebase, Drizzle ORM
  - **Tools:** Git, GitHub, Vercel, AWS, Cloudflare, GCP, Docker, Claude Code, ChatGPT, Figma, N8n
- 

### WORK EXPERIENCE

#### Fullstack Software Engineer

Tito Solutions | Feb 2026 - Present

- Led daily stand-ups (DSM) and supported sprint coordination and team alignment.
- Identified and fixed critical gaps in the mobile application, improving overall app stability and user experience.
- Built internal automation workflows integrating Jira, Confluence, and Google Chat Spaces to streamline project management and reduce manual work.

#### Web Developer

MU Digital | Jan 2025 - Feb 2026

- Shipped landing pages and built a full-stack questing platform with Discord and blockchain integration supporting thousands of users.
- Developed frontend for 4+ production apps, including a DeFi platform with wallet integration for hundreds of users.
- Built a browser-based game to increase engagement during launches and campaigns.

#### Junior Web Developer

Play it Forward | Sept 2022 - Dec 2024

- Full-stack developer using React, Next.js, Firebase, MongoDB, and NestJS to build and maintain landing pages and web applications with focus on UI quality and mobile responsiveness.
  - Integrated third-party APIs including Twitter, Steam, and Discord.
  - Self-driven research across WordPress, blockchain, game development, and mobile development to support a small team.
- 

### PROJECTS

#### Iconails – Business Management System

- Developed a unified dashboard actively used by a local nail salon, replacing scattered Excel sheets for budgeting, expenses, and customer management.
- Built an automated payroll system that cut processing time from several hours to minutes, eliminating manual, error-prone calculations.

#### The Laundry Spot – Business Management System

- Built a fullstack dashboard actively used by a local laundromat, with inventory tracking for supplies and real-time revenue monitoring.
  - Consolidated multiple spreadsheets into one system with interactive charts for expenses, profit, and inventory to prevent stockouts.
- 

### EDUCATION

Polytechnic University of the Philippines, Sto. Tomas Branch | 2018 - 2022

**BS Information Technology, Cum Laude**
